Work experience

Software engineer | Freelance | 31/12/2021 - Current | Rome, Italy

My main clients so far:

Sisal: worked in a larger team (50+ people overall) on the complete rewrite from scratch of an Android app from a cross-platform framework to native Kotlin (Coroutines, MVVM, Flows);

Angi.com: worked in a team of 30 developers and refactored parts of a 10-years old Android application from RxJava to LiveData, Kotlin Coroutines and Flows

Poste Italiane: worked on bug fixing and adding feature to a Kotlin Android application using MVVM and LiveData

Worked on my own Flutter project for a cross-platform application to handle a Twitch stream, with multiple external integrations (Discord, IRC, Twitch APIs), text-to-speech, audio.

Indie Videogame Developer | Spooky Parrots | 31/12/2021 - Current | Rome, Italy

Co-founded a small indie videogame development studio. I'm currently in charge of the development of our games. We focus on independent, story-driven and horror-like PC games with hidden secrets and "lore". We published One Last Night and Downlight. Our preferred game engine is Unity.

Mobile Tech Lead | MIR Medical International Research srl | 30/06/2021 - 30/12/2021 | Rome, Italy

End-to-end software projects management for mobile applications:

Requirements gathering from stakeholders

Resources planning (both internal and contractors)

Code reviews

Automated and manual testing overview

Final deployment to app stores

Hands on coding for the hardest and most domain-bound Android parts of our SDKs and applications.

Senior Software Developer | MIR Medical International Research srl | 31/12/2018 - 29/06/2021 | Rome, Italy

Development of an Android application ("MIR Spirobank") for patient self-monitoring, testing, health trends, sharing results with the doctor

Android maintenance and feature adding for an Android SDK (SpirobankSmart Android SDK) to connect to medical devices via BLE (data parsing, transmission, algorithms, etc)

ASP .NET Core 3.1+ Web API development, for patient and trial data submission, application errors, usage statistics, device firmware download, product registration (Entity Framework Core, Dapper, AutoMapper, Serilog)

Maintained and bug fixed other Android applications: FixSpiro, Smart One, MIR Spiro, iSpirobank

Freelance Software Developer | 30/11/2016 - 30/01/2019 | Rome, Italy

Development of "Life2020" Android app and Web API with .NET Framework 4.6 for patient data exchange and spirometry tests using FHIR standards;

Development of "Fisicamente Formazione" Android and iOS native apps (now dismissed);

Design and creation of the autoscuolecorinaldesi.it and plumsolution.it websites

Intern | Voglia D'Italia Tour | 31/03/2016 - 30/12/2016 | Pechino (Cina) e Roma (Italia)

Intern | SinoMarche Associazione Culturale | 31/10/2015 - 30/03/2016 | Jesi, Italy

Education & Training

Oriental languages and cultures degree | "La Sapienza" University | 30/09/2012 - Current | Roma, Italy

High school diploma | "Leonardo Da Vinci" High School | 31/08/2004 - 30/07/2009 | Jesi, Italy

Language Skills

Mother tongue(s): **Italian**

	Understanding		Speaking		Writing
	Listening	Reading	Spoken production	Spoken interaction	
English	C1	C1	C1	C1	C1
Chinese	B1	B2	B1	B1	B2

Skills

C# | Java | Kotlin | Android | Flutter | ASP.NET Core | Unity

Hobbies and Interests

Interests and activities

I like playing tabletop roleplaying games and boardgames in my free time

I have some programming-related hobby projects, such as an app and local server (on a Raspberry Pi) to handle my finances and investments

I love parrots, and have two of them!
